How is "Impact" Measured?

Publications are still the heart of impact

- **Researchers** count papers, impact factors, R and H indices
- **Institutions** count citations, circulation

But does your research circulation actually translate to impact?

How many researchers will actually cite your work?

How to Reach More Readers

Q: What's the secret to publishing in a high impact factor journal?

A: Make your topic broadly interesting to global, multidisciplinary readers!

- ✓ Read widely around your subject
- ✓ Check news sites to see what's 'hot' in science
- ✓ How are leaders in your field pitching work to big journals?
- ✓ Successful publishing researchers learn from mistakes

"Often stepping back; you see more, don't you?"
- David Hockney

Recommendations and Conclusion

- ransitioning toward quantum resilience requires coordinated governance reform in parallel with technical updates.
- Public institutions must document "Due Diligence" procedures to justify their decisions before courts and auditing bodies.
- The ultimate goal is to ensure the sustainability of digital government operations and the continued reliability of legal evidence in the quantum computing era.

The World is Changing Fast

Today public governance faces a paradox. Governments have many digital tools. They use electronic services and digital IDs. They apply artificial intelligence. They manage complex information systems. But governance is harder than ever. It has become more complicated and demanding.

Slide 5: The Solution: Tensor Governance

Main slide content: **New Paradigm for Public Administration and Law**

DOMAREV AI MATRIX™
TENSOR GOVERNANCE MODEL

We face a key question.
How can we manage complex systems?
Old governance models were linear.
They worked in stable times.
Modern states are dynamic networks.
They need a new way of analysis.

I present one answer: Tensor Governance.
It is implemented in the DOMAREV AI MATRIX™.
This approach sees governance as a multidimensional tensor.
It connects actors, processes, technologies, resources, and risks.

Such a model shows hidden links in laws.
It detects gaps in regulation.
It predicts risks.
It supports better decisions.

Slide 3: The Paradigm for Public Administration and Law

Slide 4: The Problem: Fragmentation of Thinking

Slide 5: The Solution: Tensor Governance

Main slide content: **The Problem: "Fragmentation of Thinking"**

When Systems Don't Work Together

The biggest problem today is what we call "fragmentation of thinking".

This means:

- Standards and laws exist in books, but they aren't used in practice.
- Technical tools are separate from management.
- And risks are often ignored until it is too late.

A "Chat" Can't Secure the House!

Practical Use of DOMAREV AI MATRIX™ in Education

- Modern society is built on knowledge and AI-driven technologies.
- Students need interdisciplinary skills to solve complex problems.
- Traditional single-discipline training is no longer enough.
- Tensor Model, integrates knowledge across different fields.

DOMAREV AI MATRIX™ helps students:

- Combine law, cybersecurity, management, and analytics.
- See connections between actors, processes, risks, and resources.
- Apply AI tools for problem-oriented learning.
- Develop analytical abilities for real-world challenges.

Outcome:
A new educational paradigm – interdisciplinary, systemic, and AI-enhanced learning.

Subject: Confirmation of Official Representation

We hereby confirm that Prof. Dr. Yurii Khlaponin is the official representative of Al-Rafidain University in Europe, authorized to represent the University in its international conferences, including the Technological Conference and the Social sciences Conference, since 2021.

This designation is issued under the authority vested in us, in recognition of his professional competence and extensive experience in representing the University in international academic and scientific forums.

With due respect,

Prof. Dr. Mahmoud Jawad Abu Al-Shaeer
President of Al-Rafidain University

Subject: Confirmation of Official Representation

We hereby confirm that Professor, Doctor **Yurii Khlaponin** is the official representative of Al-Rafidain University in Europe, authorized to represent the University at its international conferences, including the Technology Conference and the Social Sciences Conference, starting in 2021.
